

RAYMOND RENEWED

Certified, Pre-Owned Lift Trucks

Quality equipment. Smarter spend. Raymond Renewed trucks are fully inspected, refurbished and cleaned locally by Raymond Storage Concepts (RSC)—so you get reliable performance without the new-equipment price tag.

THE RSC RENEWED PROCESS

Our technicians don't just inspect—they transform. Every forklift undergoes a rigorous 22-point equipment inspection and safety check-up process:

Core Components

We examine drive units, motors and hydraulic pumps for leaks, wear and proper operation. Electrical connections are tightened and controllers are tested.

Lifting Systems

From forks to hydraulics, we test load-handling parts, inspect chains for tension. Verify mast assembly integrity and smooth lifting.

Safety & Control

We test all control response times. Verify warning systems. Confirm clear sightlines, responsive brakes and steering.

Final Detailing

Depending on your chosen warranty tier, trucks receive minor paint touch-ups or a full repaint and brand-new wheels and tires. They arrive at your facility ready to go.

RENEWED

Certified, Pre-Owned Lift Trucks

CHOOSE YOUR WARRANTY PROTECTION TIER

Select the program level that best fits your volume and application requirements:
